We are looking forward to 2025 in the NORA team. It will be an exciting year, starting with a move back to Lyngby Campus after four great years in the more rural surroundings of Risø near Roskilde. The moving boxes are unpacked, and as always, we have rolled up our sleeves to ensure stable operations and further development of Research Portal Denmark.

New Head of Denmark's Research Portal
As you may have already read, we are looking for a new head of the NORA team, so if you or someone you know dreams of leading a fantastic team and continuing the great development of Research Portal Denmark, read more here. (only in Danish)

Grant Database
The portal's new grant database is off to a great start, and we look forward to continuously adding grant data from more funders, including Villum Foundation, VELUX FOUNDATION, Innovation Fund Denmark, and Lundbeck Foundation. If you are curious about what we show in the grant database and how to search, you can watch a recording of the webinar "Introduction to the Grant Database" here.

Open Access Indicator
Since 2016, the Open Access Indicator has monitored the implementation of Denmark's National Strategy for Open Access. The annual monitoring is carried out by the NORA team, and we look forward to conducting the last official calculation under the current strategy in March. Read more about the Open Access Indicator and see results and developments over the years here.

New Data Provider in the Research Portal
We are pleased to share that the portal's publication database, Local Data, now includes publications from the National Research Centre for the Working Environment (NFA).

In addition to the inclusion of NFA publications, the database has received several new features:
• Two new filters have been implemented: 'Publisher' and 'Corresponding Author.' These filters make it easier for users to find relevant information among the vast amount of data displayed from Danish research institutions.
• The database now includes more publication types, such as 'Editorials' and commissioned work like 'Memorandum/Exposition.'
• All new fields and information can, as always, be exported along with the other fields from Local Data. Read more about data downloads here.

As always, we would love to hear from you if you have any questions, suggestions, or feedback.

The NORA Team, February 7, 2025
